

Reinhardt Windsocks for Miniature Microphones

Soft Fur Windsock for Lapel and Tie clip microphones. LAP & Mini-LAP

Two sizes are available. The LAP for older style microphones with a diameter of up to approximately 12mm diameter and the Mini-LAP for modern subminiature tie-clip microphones

Each set comes complete with a foam windshield insert as well as a removable tie clip

Insert the microphone with the included foam windshield for extra protection against wind and handling noise.

The Velcro strip seals securely around the microphone cable so that it does not rattle and the windshield cannot fall off or blow away

If required, the removable tie-clip is attached to the back of the windshield.

The clip can then be swivelled to the most convenient position
